

Curriculum Statement - Business

GCSE Business is a qualification that develops knowledge and skills not only for success in the Business sector, but also for a range of roles and management positions. Our economic future is dependent on inspired young people developing and running successful businesses.

Students learn about the various factors that will affect them in business from economic issues to finance. The knowledge acquired gives students key skills for their future and ensures a solid base to study Business and Economics related subjects in higher education.

We aim to provide students who choose Business with a rewarding experience that allows them to relate to current affairs in the world around them. We prepare students to be confident individuals who are able to deal with various aspects of business and management, whether that be in running their own business or in their chosen career. This will be accomplished through our commitment to excellent teaching and a well-designed curriculum to motivate and engage students. We hope that students will develop their own business ideas, skills and confidence to allow them to flourish and contribute to our future economy.

We want to provide students with an enjoyable Business curriculum. This GCSE is assessed via two final year exams 9-1 and we endeavour to ensure students feel challenged and confident in preparation for this.

*“Business opportunities are likes buses, there's always another one coming” –
Richard Branson*
