

Every Child. Inspiring Learning. Every Day.

Curriculum Statement – Photography

Our inclusive curriculum ensures that every child, regardless of starting point, income, disability or disadvantage, makes outstanding progress and achieves their full potential. This is key to our commitment that 'Every Child' receives the highest quality of education. Any inequality, irrespective of cause, is challenged and repaired through a restorative approach to our student's education. Our highly trained staff team build learning relationships that support the mental health of all our students.

Photography is a subject that allows us to use technology and photographic equipment and skills to observe and comment on the world around us.

Photography is a rewarding and exciting subject where ideas are captured through images, metaphors and pictures communicating thoughts and points of view. Using digital images, film cameras and moving image students can explore and create images that are beautiful, challenging and exciting. A window on the world.

Students will study Photographers from the first precursors of photography from the 18th and 19th Centuries, right up to the current day. Their work will allow them to explore and express their own creativity and sense of self and equip them to go on to further studies or careers in this creative field.

"It is an illusion that photos are made with the camera...they are made with the eye, heart and head"

Henri Cartier-Bresson
