

Curriculum Statement -Art

Art is a subject that enables our students to discover, explore and create using their observational skills of the world around them.

Art is among the most rewarding subjects to study, offering students the opportunity to not only develop their academic abilities, but also to grow as creative, confident and well-rounded individuals. Studying Art provides a blend of guided and team skills with ample individual work where students must take initiative and develop their own creative voice. Students will discover a tantalising array of new artistic techniques, materials, styles and methods. They will study a riveting array of artwork from different periods and cultures, analysing, critiquing, and unveiling the intricate relationship between Art and Society.

“Art must be life; it must belong to everyone”

Marina Abramovic
