

Curriculum Statement – Photography

Photography

Photography is a subject that allows us to use technology and photographic equipment and skills to observe and comment on the world around us. Using digital images, film cameras and moving image students can explore and create images that are beautiful, challenging and exciting. Students will study Photographers from the first precursors of photography from the 18th and 19th Centuries up to the current day.

Photography is a rewarding and exciting subject where ideas are captured through images, metaphors and pictures communicating thoughts and points of view.

"It is an illusion that photos are made with the camera...they are made with the eye, heart and head"

Henri Cartier-Bresson
